

3G Programmer (A-V5)

Product ID: 3GAP

The 3G Programmer is used to connect Acsys' mechatronic keys and locks with the Acsysware database remotely. Each programmer transfers the access rights assigned to specific user keys and users can enjoy a more convenient manner to update their user keys remotely.

Through the 3G/2G network, an 3G Programmer can be placed in any location and is used to quickly edit, or delete user keys and to upload access logs from user keys or locks through the transfer keys.

General	
Dimensions	165 x 160 x 33 mm
Material	Plastic Housing / LED
LED	On / Ready / Busy
Life Expectancy	5 years; guaranteed 2 years
Environment Specifications	
Operating Temperature	-10 to 60 °C
Storage temperature	-20 to 70 °C
Humidity	5% to 95%, non-condensing
Electronic	
Power Supply	DC power supply: 5V, 2A
Connectivity	3G module: WCDMA-7.2M (850/1900/2100Mhz)
Encryption Algorithm	AES 128bit
Compatibility	
Keys	All Key Types
Compliance	
Quality Certification	CE, FCC, ROHS
